

Quality Policy

GEOÁREA is a consulting firm specialized in the subjects of geotechnics and environment, endowed with a technical staff and equipment that assures a high-quality work standard as well as the fulfilment of all contractual deadlines.

The expertise, professionalism and dedication that identifies our human resources leads GEOAREA to an up-to-date, dynamic and competitive market vision.

Our services aim to provide a high-quality standard, and our technical team comprises experienced staff in the subjects of geology, engineering geology and geotechnics, which have participated in the main design and construction works developed in Portugal in past decade.

GEOÁREA assumes the commitment to fulfil the following principles:

-  Promote better proximity relation within the various parts involved, in order to correspond to necessities and expectations, achieving better quality services and client satisfaction.
-  Manage the internal tasks according to the sustainable development principles in economic, social and environmental areas.
-  According to the performance results, GEOÁREA assumes the responsibility to analyse and review periodically, the adequacy and application of our policy, goals and processes, assuring the continuous improvement of the Quality Management System.
-  Comply with the current laws, regulations and other requirements directly related with the activity to develop.
-  Promote the professional development of the employees, assure the adequacy of their competencies to the function to be performed and promote the assessment of the risk involved to the tasks;
-  Ensure the existence, follow up and maintenance of the necessary resources to an effective implementation of the quality management system, in order to assure the processes operationalization and conformity of the services.

By establishing this policy GEOÁREA commits to the continuous search for improvement of its Quality and Environment Management System and also the fulfilment of the requirements stated in NP EN ISO9001.
